Professional Summary

Results-driven Software Development Engineer with 1+ years of experience developing responsive, high-performance web applications. Proficient in React.js, JavaScript, SQL, and MongoDB with a strong foundation in API integration, state management, and database optimization. Passionate about creating seamless user experiences and solving complex technical challenges through innovative solutions.

Technical Skills

Frontend & UI Libraries: HTML5, CSS3, JavaScript (ES6+), JQuery, React.js, Redux, Zustand, Bootstrap 5, Tailwind CSS, Styled Components, Material UI (MUI), Acertinity UI, shadcn/ui, Axios

Backend & Databases: PHP, Node.js (basic), MySQL, MongoDB, MariaDB

Authentication & APIs: Google Auth, GitHub Auth, RESTful APIs

AI/LLM Technologies: ChatGPT, Gemini, Claude

Tools & Version Control Git, GitHub, Postman, FileZilla, PuTTY

Experience

Web Developer, Aero Flight Technology Group – Delhi, India

- Designed and developed dynamic, high-performance web applications using HTML, CSS, JavaScript, and MongoDB
- Implemented API integrations with Kayak and Revelex to enhance data connectivity and functionality.
- Contributed to both frontend (React.js) and backend (MongoDB) development, improving usability and performance.
- Managed version control using Git and GitHub for collaborative workflows.

Web Developer, KMSG Tech Pvt Ltd – Delhi, India

- Integrated third-party APIs to extend application functionality and ensure seamless data exchange, improving overall system capabilities
- Managed project deployment using FileZilla and PuTTY for efficient server management and application delivery.
- Implemented version control using Git, collaborating effectively on codebase management and ensuring smooth development workflows.

Projects

Job Portal Website – React.js Developer

- Developing a comprehensive job portal website using React.js with modern UI/UX principles.
- Implementing advanced features including job filtering, application tracking, and user profiles.
- Integrating authentication systems with Google Auth and GitHub Auth for seamless user access.
- Utilizing Zustand for efficient state management and MariaDB for robust data storage.
- Ensuring responsive design across all devices for optimal user experience.

Flight Data Management System – Full Stack Developer

- Developed and implemented a comprehensive flight data management system handling real-time flight information from multiple sources.
- Successfully added passive segment functionality to the system, enhancing data tracking capabilities for flight operations.
- Implemented confirmation number and ticket number generation system, improving booking verification and customer service efficiency.
- Created dynamic ticket templates using Twig templating engine, generating personalized tickets with real-time flight data.

School Management System

- Developed a school management system with React.js for the frontend and MySQL for backend data management.
- Conducted API testing using Postman for reliable frontend-backend communication.
- Managed deployment securely using FileZilla and PuTTY.

Education

Master of Computer Science, Indira Gandhi University, Rewari, India

Bachelor of Science (PCM), Ahir College, Rewari, India

High School (Science), GSSS, Rewari, India

Certifications & Training

Web Technologies Course (HTML, CSS, JavaScript, React.js, MySQL)
